Title:

Comments: I am enrolled tribal member of the Oglala Sioux tribe in PineRidge South Dakota. The "Paha Sapa" meaning Black Hills in my Lakota language. Water is life and I am against this mining and drill in the Sacred Black hills of South Dakota. We need these minerals to stay in the ground of Mother Earth. She gives us humans life on her planet Earth and we need to respect that. I stand with Mother Earth to protect her we cannot allow the mining of these minerals of Graphite or Uranium for the electric cars. Doing this could damage the Ozone layers even more. Thank you for your understanding of this matter and what it means to us Lakota people for all human beings and living things dwelling on this planet Earth. Aho ???
