Title:

Comments: To whom it may concern. We are the stewards of this earth. We hold the responsibility to protect the water, the earth, and the air we breathe. Nothing is given to us more sacred than this.

Please stop drilling in our sacred land.

The history that has survived thousands of years is recorded in these lands.

It is our responsibility to maintain and care for. Our heritage, even if we came from other places since we are all one human family.
