Comments: As an outdoors enthusiast and a concerned citizen of New Hampshire i feel it is imperative that this project go forward and be completed without delay. Proper management of our forests is of utmost importance in a time when more and more land is labeled "hands off". There are numerous species of both plants and animals that require a diverse forest ecosystem to not only thrive but to actually survive. Every year our forests grow uniform in age, tree density, and as a result wildlife habitat for species of concern grows smaller. There is overwhelming evidence that left to mature out without disruption forests become unhealthy and eventually devoid of most life other than a few apex predators and species that are large enough to find them off. I hope this project is completed in its entirety and on time. Thank you!
