Comments: Additional parking is not needed. I frequent the minors creek trailhead parking most days, as this is my back yard. I have never witnessed a lack of parking. If this were the case, we would see cars parked along minors creek rd (which btw is directly behind my ophir man unit) and I never see this. If you feel additional parking for the bike path or trail hiking is needed use the east side of the frisco clinic. This is a huge space never filled and it has easy access to the bike path and trails. Also adding parking in the proposed location will only increase, unnecessarily, traffic along minors creek rd.

Also, I object to the change in the Peaks Trail trailhead. There is absolutely nothing wrong with where it is now. And the clear cutting is too extreme.
