Comments: To the Forest Service,

We, the public, don't know nearly enough about the new owners of Holland Lk Lodge. We need to see their plans; these plans should include how they'll clean up the sewage from the failed system. I don't see how *any* new owner can merit a 20-yr permit for a lodge that has considerable impacts on the surrounding wilderness.

If I had my way, no lodges for any type of recreation would be sited in the midst of our shrinking wild areas. However, here goes the govt, screwing the grizzly and the grouse once again. When we moved to Bigfork, there were grouse all over, but our anal-retentive neighbors cleared so much land that the habitat is gone. I want my Forest Service to keep this from occurring on our wild lands! That is their function!
