Comments: We have 4 million visitors coming to our area every year, mostly the summer. I disagree with any mining in the beautiful black hills. Especially around stage stop. It's a historic area and should be preserved. Not mined. It's best to leave it alone for our kids and grandkids to enjoy and appreciate.

I surely don't like someone being told what they can and can not do with their land. But at times it's a difficult decision that needs to be made. Save our hills!
