Comments: Please do not allow any exploratory drilling in the Black Hills. That land is not only beautiful and available to the general public to enjoy, it is sacred to the Native American community. With a nearby watershed, contamination of our water supply is also a very real threat. Everyone wants clean water. I don't see how the benefit to one company outweighs the rest of this community. If we continue to strip our public lands, there will be nothing beautiful left to appreciate and then, what will be the point?
