Comments: Re: Holland Lake Lodge, Swan Valley, Montana

About plans to "transfer the permit as it is": We are very concerned about that and urge you NOT to issue a permit to Holland Lake Lodge, until all the permitting requirements have been followed, overall permit and sub-permits both (wastewater lagoon, for example). We know you have received detailed information about this from many concerned citizens, so will not repeat it here. But we do want you to know we agree with them!

Our family built one of the first cabins on the south side of the lake, starting in 1947. We, generations of us now, treasure what Holland Lake and the Swan Valley offer. At this time when development pressures are building, it's really important that you take all necessary steps to see permitting is done right, now and for the future.

Thank you.
