Title:

Comments: Mining in a space sacred to the Lakota is a heinous and unethical thing to do. Haven't Native Americans suffered enough indignity and sacrilege? Yes. Yes, they have. They have done nothing to deserve this affront to their religion and their culture. Pe'sla is Indian Land. Settlers like us need to respect that and keep our venal, greedy little corporations in check. This project is unChristian, unethical, and unpardonable. Anyone who supports condones or allows this project should boil in Hell along with Pete Lien and Sons. I doubt their money will be any comfort among the flames.
