Comments: I am commenting in oposition of the drilling permits for this project. My concerns include, but are not limited to impacts to water, land, cultural & historical resources, Tribal rights and Treaty violations, and public access. Hasn't HeSapa (the Black Hills) suffered enough? Hasn't HeSapa already suffered far too many extraction violations, or will you not be content until the entire region dies for a few pennies in the coffers of those who already have far too much? Where does the greed end?
