Title:

Comments: This project proposal has the smell of reckless anti environmental Trumpism written all over it. NEPA, and the ESA are, or should be in direct conflict with this proposal. This is spotted owl habitat and much of the forest is Old Growth, or approaching it. The springs, creeks, and adjacent waterways are critical for salmon habitat. This is the last thing we need, or want in our cherished National Forest! I strongly oppose this project.
Thanks, Ronald Gillilan
