Title:

Comments: I strongly urge you to cancel or modify the logging in the Lost River Integrated Resource Project as it poses severe damage to the surroundings in the roadless areas that it impacts. New England has few wild places left and this is a particularly important one due to:

- 1) Impact of logging and necessary roads on both water quality and its retention to lessen flooding in downslope areas;
- 2) Interruption on habitat for animal migration and movement;
- 3) Impact on benefit of forest cover for carbon storage and climate mitigation.

Your careful consideration of the above will be gratefully appreciated.
