Comments: I am writing to oppose the Rochford Mineral Exploratory Drilling project.

Aside from the environmental dangers of this project, the greater impact is the location at the sacred site known as Pe'Sla. This project is a violation of Tribal treaty rights and an attack on Indigenous cultural values.

Pe'Sla is an ancient holy site to which the Lakota people still return for ceremonial gathering annually, as well as for individual spiritual purposes throughout the year. This site is irreplaceable to multiple tribe's religious practices.

Please do NOT approve this project.
