Comments: I am writing to ask that alternative 3 be selected in the proposed Grand Targhee Expansion. I believe that expansion should be limited to the current ski area. Not only is Targhee located in a ecosystem of great value and sensitivity, it is also remote and difficult to support. Targhee already creates a great deal of pollution in a pristine environment, expansion will exacerbate this problem. I would like to see no expansion of Targhee, but I believe in the right of the business owner to maximize their potential within the limits that were set when the property of acquired. Please do not put the desires of the current owners above the rights of the community; the community of both the people and the wildlife of the area.
