Title:

Comments: I object to the mining project as this land is sacred to the Lakota people, along with the environmental dangers posed by this project. It is not only irreplaceable in the environment and in its beauty, but also cannot be replaced in many tribes' religious practices. We are a country of religious freedom and should not take away any religion's sacred site. The impact from this project on the environment is also abhorrent when many of our beautiful parks and forests are already being taken away.

Please do not move forward with this project.
