Title:

Comments: Dear USFS Representative:

Please remember that any and all ground disturbing activities must be in coordination, consultation, and collaboration with Federally recognized Tribal Governments. Especially, if there is any potential impacts to ancestral sacred lands, resources, and/or their legal rights in protecting, accessing, and utilizing natural resources as part of their native cultural, religious, and subsistence lifeways. This will assist in protecting the Pe'Sala sacred site from any destructive construction and ground disturbing activities by Pete Liens & Sons' proposed Rochford Mineral Exploratory Drilling Project (RMEDP). As reference, please check NEPA regarding the protection of Native American Tribal cultural resources, religious activities, and traditional subsistence needs. Plus most importantly the Federal Government must comply with the agreements contained in the Treaties with these Tribal Governments.

Thank you for your consideration and valuable time.

Respectfully,

Carolyn Yee
