Comments: Greetings,

I am writing as a concerned citizen. I urge the Forest Service to retire an environmental impact project report for this mineral drilling project (67838). I care about our environment and water resources. In my hometown in Ohio, fracking drilling caused fires and contaminated all the well water of our neighbors. We don't need to make the same mistakes, continuing to drill for wealth and business at the cost of our natural resources. Additionally, there is potential to contaminate sacred Lakota lands, which we should honor because we are humans with dignity- they are the original caretakers of this place.
