Comments: Please do not do this. Rochford Mineral Exploratory Drilling Project #67838 is far too close to the Black Hills, which are valuable for far more than some mineral. We have taken more than enough already from this land and the people who live on it and know it to be sacred. I want my children-heck, I want myself- to not inherit a broken, burned world sucked dry for some corporate greed and short-term gain. At least give a 60-day extension for the public comment period so that the people may speak and make their voices known. At least require an Environmental Impact Statement so we know just how much damage we are taking.
