Comments: I am writing as a concerned citizen. The project #67838 would, to me, be disastrous for the environment and for the Lakota people who consider this sacred land. From what I understand, contamination could occur in the watershed, surrounding streams, and possibly underground water sources. The environmental impact coupled with the disrespectful disruption of ceremonial practices by the Lakota people would make a decision such as this a remarkably bad one. Before any decision is made, I request that an Environmental Impact Statement (EIS) be performed.
