Comments: I am opposed to Rochford Mineral Exploratory Drilling Project #67838. Please don't allow Rochford or any other entity to drill or mine in any part of Pe'Sla including any areas where the borders have not been clearly established. It would be insulting to the people who live there and hold the area sacred, and (at least as important) it would likely contaminate the water. That alone should be a deal-breaker. Clean water is hard to come by these days. There doesn't even seem to be an environmental impact statement for this project, which there should be. The whole thing sounds rotten.
