Title:

Comments: Please protect the Black Hills from Rochford and any other mineral exploratory drilling project, anything extractive. That destroys our home. I do not understand the short-sightedness of industry, in these times, but I think federal governments and industry as a whole are so out of touch with reality, it might be funny if there weren't so much harm from it. I am from the southeast and live in the southeast, but I have been involved in environmental activism on a local level, even with a non-fundraising non-profit, going on 20 years ago. We shouldn't keep having to fight the same fights, and we do this with words, and we do it with respect, and I respectfully ask you to please protect the Black Hills from industry and any other threat.
