Comments: I am asking for a 60 day extension of the public comment period regarding the Rochford Mineral Exploratory Drilling Project. The potential and very likely negative environmental impacts of this project outweigh any amount of profit to be made. The disruption and disregard of Native people and their ceremonial practices by the US is appalling. Please listen to this overlooked group and their voices, I have spent my time writing this to make it clear that I oppose this project as do many other people. This project requires an Environmental Impact Statement (EIS) to be released.
