Title:

Comments: My husband and I both grew up on the edge of the Black Hills. Though we are not native we do have a spiritual connection to this sacred land.

I am offended that the Lakota people will lose stewardship over this land. They have been betrayed time and again. Enough. Let that stop here.

I am hoping you will extend the time for comments so that everyone who cares about this project has a chance to speak to it.

Please do an environmental impact study at a minimum.
