Title:

Comments: BHCWA's research tells us that "the project would involve 18 drill pads. Exploration could contaminate water in the upper Rapid Creek watershed, with some proposed drill pads very close to streams. And there is also the potential for contamination or cross-contamination of underground water sources.

I would appreciate it if you could request an EIS and give everyone 60 days to submit their comments. And as stated above, I am against all drilling.

1. Human rights violations

2. Destruction of nature
