Comments: In regards to Rochford Mineral Exploratory Drilling Project #67838, I ask that the public comment period be extended out 60 days to allow all concerned people a chance to make their voices heard.

I am opposed to this project because mining shouldn't take place on Native Americans' sacred sites, no matter how many minerals/oil/gas/other items someone wants to profit from lie beneath it. We need to respect all people's religious sites, end of story. There is also the potential for contamination of the watershed. There are too many problems with this site, and that makes this project unacceptable.
