Title:

Comments: I oppose the Rochford Mineral Exploratory Drilling Project because the potential negative impact on the environment (pollution, destruction) is serious, and it would also be disrespectful and disruptive to the Lakotas and their ceremonial practices.

Please require an Environmental Impact Statement (EIS) for this project.

Please allow a 60-day extension of the public comment period on Rochford Mineral Exploratory Drilling Project #67838), so everyone has an opportunity to comment.

This is a pristine ecosystem and beautiful place. Let's not ruin it, the way we have ruined so much of our land.
