Title:

Comments: This is sacred, historical land. Part and parcel to what makes our country's face and place in the world. Allowing this to be marred and defaced in Any manner is wrong, and frankly, anti-American. More than that it is a direct attack against a mighty people whose rights and lands have been moved, removed, diminished, and destroyed.

This has to stop, and denying this invasive destruction is a small, but great, first step.

To this area the action will result in permanent destruction to places important to the areas folk, for limited, minimal results. Some thing has to be more important that short term Greed.
