Title:

Comments: I write about the Rochford Mineral Exploratory Drilling Project #67838. People who live near there tell me that this project would endanger their water supply and encroach on their ceremonial land. These are serious concerns that must be addressed. An Environmental Impact Study, unbiased by drilling interests, should be conducted.

This earth we live in is tired out by all poking and scraping we humans do to it. Rather than an endless search for more energy and more stuff, it would be better to work with what we have, even if that means less energy and less stuff. We only have this one Earth, a place many call Mother.
