Title:

Comments: Please protect the sacred lands of the native American Indian peoples from all exploitation, especially from mining and drilling. The United States has obligations to uphold the treaties it entered into with the Indigenous peoples of the United States and the world. The indigenous people and their lands and resources are all protected by the laws and treaties of both the United States and the United Nations governments by both treaties as well as the laws.

Please honor these rights and freedoms they have been promised. These lands are sacred to these peoples.

It is also in the best interests of the United States of America to keep these lands as prestige as possible.

Because when you open the lands to mining and drilling it poisons the land and waters and makes the inhabitants sick, not only destroying the beauty of the natural land and destroying the sacred sites of the indigenous peoples.
