Comments: Dear National Forests,

Please do not allow the Rochford Mineral Exploratory Drilling Project #67838 to proceed or take over the ability to drill on the lands of the Black Hills.

There is no need to begin or the need to research out land in this area for the use of drilling. I'm a protector of the lands and clean water and this drilling would endanger the bio web of ecology that surrounds these areas. Drilling also harms and threatens the natural nature that lives in these areas and will greatly increase the desecration paradigms the world is facing.

Thank you!
