Comments: The US government has taken so much from the indigenous peoples of the land, this additional insult of one of the few sacred places they have left CANNOT be allowed to happen!!!

Black Hills Clean Water Alliance (BHCWA) have pointed out, this project is immediately adjacent to - and some proposed drill pads might encroach on - Pe' Sla. Maps are vague, but, in their words, "by any definition, the project is too close!"

BHCWA's research tells us that "the project would involve 18 drill pads. Exploration could contaminate water in the upper Rapid Creek watershed, with some proposed drill pads very close to streams. And there is also the potential for contamination or cross-contamination of underground water sources."
