Comments: Dear US Forest Service,

Please do not drill into sacred ground. Please leave it alone and do not destroy it for short-term interests. Industrialization overall is very harmful to our planet and this is just one of the many examples of a continued cycle of harm to the Earth. Not only is this project dangerous noting that it might cause contamination to water sources, but it also involves the target of a Native American sacred ground. This by all rights should be left alone.

Thank you

Jacob
