Comments: Dear Forest Service,

We depend on your protection of our lands, waters, and the sacred ways of life of our indigenous nations and in this particular case the Lakota people who depend on the sacred black hills as a way of life...a people who remember who they are and still upholds the purpose of their being which is to protect the earth and all her children. Please help us protect Pe' Sla, a very sacred and beautiful territory with a now pristine ecosystem which could forever be changed by drilling. We must be willing to put the lives of the people before those who could molest these lands in the name of progress, a progress that only lines the pockets of those who may not care about the future generations as these people do. They have had enough stolen from them and yet they still pray for us. Let us not walk in manner that cuts us off from and may destroy our earth, for to do so only destroys us. Let us have clean waters and sacred lands, for the good of us all. Please say no to Pete Lien and Sons Rochford Mineral Exploratory Drilling Project #67838

Thank you
