Comments: To whom it may concern, I am asking that the Rochford Mineral Exploratory Drilling Project #67838 is not allowed to go forward due to the potential harm to people and then surrounding environment. I also ask that there is a 60 day extension of the public comment period to allow more public input to be given for such a large and impactful project. If this project is allowed to go forward it could cause large problems for the surrounding environment by bringing to the surface materials that are supposed to be in the ground and also by disrupting traditional ceremonial practices for Lakota people. Finally, I would like to request that the Forest Service requires an Environmental Impact Statement for this project. Thank you for your time and consideration.
