Comments: I am upset that you are going to cut trees in over one thousand acres of beautiful forest in NH. This will lead to a huge loss of habitat for wildlife that currently lives in the forest, including birds and bats. We need the forest for carbon capture to slow climate change. Cutting all those trees will compact the soil and cause more runoff of rainfall. The forest will be dryer and more likely to have wildfires. I love hiking in the forest in NH and much of it will be ruined by this cutting.

David
