Comments: I am a Hunkpapa Lakota Citizen and I am opposed to the Rochford Mineral Exploratory drilling Project #67838 bc it is on un ceded Lakota treaty territory and a site considered to be of great sacred significance to the Oceti Sakowin people. I am also very concerned that this project is endangering critical fresh water sources which must be protected by all means necessary. The Forest Service needs to conduct a EIS as well as consult with the Lakota people before this project can be considered for destruction and the uncompensated taking of resources that are on un ceded Lakota treaty lands.
