Comments: Dear everyone,

My ancestors line goes back to the year 1257 in Switzerland and I still live most time in the same valley where my forefathers lived.

Since my childhood days I am impressed how the indigenous Native Americans resist and "fight" peacefully for their land and rights, human rights and given by the United States .

This gives me power to go on and to live.

Please don't destroy the sacred Black Hills, not "only" because this is sacred land to them. But also because it would destroy resources of water and others for the coming generations forever!

Sincerely and in hope, Indy Imfeld
