Comments: To whom it may concern . We are here to let you know of our concerns to issue a new permit for Holland Lake are unacceptable under the conditions you are proposing,especially a 20 year permit.This should be issued on a yearly basis.(If at all) All of the issues in regards to waste water and management need to be met. The FNF need to provide an EA or EIS. The animals that reside here (some endangered) need to be protected. This is a beautiful sacred place that needs to be preserved. A massive resort with year round access is not feasible.Please keep it quant and beautiful. THIS is public land that us and many others have enjoyed peacefully for a very long time and it should stay as so. In short because we are at the deadline my family and I are in full agreeance. with the complaints against this sale and permit. PLEASE stop
