Comments: Hello, I have been visiting this area of Montana for many years now as my mother in-law has a family cabin in the area. I believe that Holland lake should remain open for public use and maintain it's current footprint and not be expanded. This is a very magically area with an immense about of wildlife that needs to be protected and not encroached on any further. I agree that holland lake should be maintained so it can be shared with future generations but I am against any expansion of holland lake or making holland lake not accessible or affordable for the general public.
