First name: Steve

Last name: Kuschner

Organization: Roaring Fork Valley 350.org

Title: Coordinator

Comments: I am concerned for the rights of people over profit, the project that is being considered could damage the land and its ability to protect its people against pollution of their access to clean water. We need an Environmental assessment before we permanently change the landscape and damage our land for the economic gain of the few. We must be wary of being accessories to the promise of money and riches that could never compare to the benefits that our earth gives the many. Please consider to continue to balance the scales in favor of the planet and the people not the large corporate interests who are only interested in profits
