Comments: Targhee is special because it is still an extremely profitable ski mountain while maintaining the small family small town feel, and this is what lots of people love about Targhee. It would be changing the resort and it's values and it's base completely by allowing such ridiculous expansion to occur.

Most importantly, Grand Targhee is talking about expanding into public protected land that is wild and wonderful and would be absolutely tainted by this expansion. It would do unreasonable light and sound pollution and add to even more habitat fragmentation and disturbance in on the of the most special places on this planet. Please, DO NOT ALLOW THIS EXPANSION.

I have skied at large resorts with developments that Targhee is proposing and I have never once skied at Targhee and wished those were present or thought the experience would be better due to that. People come to Targhee without this destructive ridiculous expansion proposal, because it is a gem that does not need more fake diamonds added to the side. Think about this community, the core values, it's base population, the environment, and the ecosystem and it's animals that will all be directly affected by these proposed changes, and if you spend even 1 second doing that you will realize this is wrong.

I VOTE NO
