Comments: The site where the Rochford Mineral Exploratory Drilling Project is proposed surrounds and now proven that it violates property rights of Pe'Sla indigenous ceremonial grounds.

The exploratory drill sites sit in the middle of drainage's that feed Rapid Creek and the drinking water source for all of Rapid City and Ellsworth Air Force Base. It is time we all stop taking our sacred water sources for granted.

Please deny this project. At the very least a full EIS is needed.

Thank you for your time and consideration,

Juli Ames-Curtis
