First name: Geoffry

Last name: Tollin

Organization:

Title:

Comments: The negative impacts of this activity are much worse than the benefits, which would include protecting the environment for decades to come, not to mention the sacrosanct nature of these Native American (they were here 1st) lands. Unfortunately, modern mining does not ever take into account any attribute except greed; not to mention contributing to global warming and the rapid degradation of our planet, which believe it or not, some of us actually care about.
