Title:

Comments: Do not allow mining on the sacred land of the Lakota people. This land has been stewarded for many millennium by the people native to this land and it is not the Forest Service's place to desecrate it. Stop this assault on land that does not belong to mining companies, the U.S. government or anyone who does not have the best interests of the indigenous people in mind. This project must not be allowed to go forward. Thank you for listening.
