Title:

Comments: Listen to Native voices and DO NOT ALLOW this to move forward on their scared lands. The systemic oppression and genocide of the indigenous peoples of Turtle Island will become the demise of the United States unless their voices are not only heard, but elevated by agencies such as yourself. The USFS is currently under strategic attack and at risk of dissolution. Please fight back, please know that the public is with you, and please know we need you to express the will of the Native peoples.
