Title:

Comments: This action will render all sacred lands in danger of corporate greed. Does the pain inflicted by the cornering of indigenous people to the smallest reserves possible and decimation of their native land not already weigh heavy enough on our shoulders? If you drill at one sacred site, you can drill at any. Please, consider the children and the families who value this site and who are running out of sacred lands to treasure, and please do not allow the exploratory drilling to occur here.
