Title:

Comments: This is a simply abhorrent project. You would destroy irreplaceable life that makes up a significant portion of the local environment, causing irreparable damage to the environment, and the lives of all beings in the area for generations, for what? Pencils? Computers? If you believe in keeping a future for your own children, I urge you not only to vote against this mine, but speak against it in every public forum available to you, and use only the strongest possible terms when speaking against this fascism, and all other fascism you are faced with being complicit in during these interesting times.
