Comments: As a concerned citizen, I urge officials to protect this exploratory drilling of sacred Lakota land. The exploitation of Natives in our country has had irreparable damage to Native people, and we must not be complacent in perpetrating it any further. I had the pleasure of working with the Lakota in high school, specifically the Pine Ridge Reservation. Their land, their people, have been exploited enough. This is an unconscionable, despicable act, one that we must not stand for. Thank you for your time.
