Title:

Comments: This earth will outlive us, but we will not!!! Our planet has seen devastating extinction events for much of its lifetime as recorded in our very soil, and if we destroy our chance to live life on this planet that is only the fault of our species. We must respect and protect our world in anyway we can, she is the mother that nurtures us and gives us life there is no planet like her that will sustain us as well. The only benefit violating our Gaia has is short term profit, which will be outlived and create irrevocable damage to our world of your children and children's children. SAVE OUR WORLD!!! DEFEND THE LAND OF INDIGENOUS PEOPLES FROM COLONIZATION!!
