Title:

Comments: Pe'sla is a sacred site in the Black Hills which has been used for ceremonial gatherings of Lakota, Dakota, and other nations for thousands of years. The area is beloved by so many, Native and non-Native.

Please, please consider how this land will be affected by this project in 50 years, 100 years. Our planet cannot afford more drilling, we see the effects of it every day around the country and the world. Consider your children, your grandchildren - they will not have clean water to drink, clean air to breathe, parks to play in, if we continue on this path.
